1973 HOWARD HIGH SCHOOL BASKETBALL TEAM

(Mr. CARNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARNEY. Mr. Speaker, today I rise to recognize the 1973 basketball team from Howard High School in Wilmington, Delaware. This year marks 40 years since Howard's sensational '73 team won Delaware's boys State championship with an undefeated season of 24-0.

Howard's '73 team wasn't the biggest; but the Wildcats were disciplined, and they played with a lot of heart. They were led by their brilliant guards David Roane and Kenny Hynson and the irrepressible Mike Miller, who battled much taller players under the boards.

Supported by a big family of coaches, teachers, classmates, and Howard alumni, the Wildcats became the first team in Delaware history to finish the season undefeated.

There were several games where it looked like Howard might get knocked off, including a nail-biter against the much bigger Salesianum in the State semifinal; but the Wildcats were always able to pull out the victory in the end.

Today I want to recognize Howard High School's 1973 boys basketball team, honor them for their historic season, and thank them for the work they continue to do for youth in the State of Delaware.

HOMEOWNERS FLOOD INSURANCE RELIEF ACT

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILIRAKIS. Mr. Speaker, homeowners in my home State of Florida and across the country face significant flood insurance rate increases as a result of the reforms made to address the solvency of the National Flood Insurance Program.

To ensure that NFIP remains both affordable for homeowners and sustainable for taxpayers, I have introduced H.R. 3312, the Homeowners Flood Insurance Relief Act. The bill would cap a homeowner's premiums at the end of a 10-year phase-in to no more than the appraised value of the structure over the course of a 30-year mortgage. It would also allow homeowners to pay premiums on a more affordable monthly basis rather than an annual lump sum.

These commonsense changes will ensure that homeowners stay in the pro-

gram and any increased premiums do not harm the already fragile housing market's recovery. Furthermore, they continue the intent of the NFIP, protecting homeowners from devastating floods while also ensuring the program is able to cover its costs.

I look forward to working with my colleagues to move this legislation forward.

CLIMATE CHANGE

(Ms. MATSUI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. MATSUI. Mr. Speaker, I rise today as a member of the Safe Climate Caucus to highlight the 100th legislative day that my colleagues and I have come to the House floor and called for action on climate change.

Since we started this effort, California has been rocked by devastating wildfires, the Midwest has been damaged by tornadoes, an early-season blizzard has wiped out livestock in the Dakotas, and deadly floods have destroyed parts of Colorado.

Extreme weather events caused by climate change continue to affect families and businesses across this country. These are not random occurrences, but constant reminders that climate change is real. We will continue to make our voices heard on the House floor until everyone comes to the table, effective action is taken, and future generations are protected.

OBAMACARE IS NOT WORKING

(Mr. DUFFY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUFFY. Mr. Speaker, as I listen to the conversation this morning and the 1 minutes that are given, I don't hear many of my friends across the aisle talking about ObamaCare.

When I am back at home, I am hearing from thousands of people who have lost their insurance—people who did the right thing: Americans who bought insurance to cover themselves and their families who have now lost their insurance; Americans who we asked to do the right thing, and they did it.

In Wisconsin, 95 percent of Wisconsinites were covered. Instead of working on the 5 percent that weren't covered, we have now abandoned our health care system, and it is broken for those Americans who tried to do the right thing.

In my district, Denise needs a kidney transplant. She has lost her insurance. She has lost her doctor. She is going to the exchange looking for insurance, and the one option that she has doesn't provide coverage for her current doctor. This is life and death for so many Americans.

I hope that my friends across the aisle will start to talk about ObamaCare and how we fix it to make

it work for the American people, because right now it is not working.

A NEW DAY FOR HEALTH CARE IN AMERICA

(Mr. YARMUTH asked and was given permission to address the House for 1 minute.)

Mr. YARMUTH. Mr. Speaker, the prior speaker's prayers are about to be answered.

Mr. Speaker, my State of Kentucky is a national model for how the Affordable Care Act can make our constituents' lives more secure and their businesses stronger. I would like to share one story. Will Russell is the owner of Why Louisville, a small independent business in my district that specializes in locally designed clothing and art. The father of a 1-year-old, he also has a preexisting condition that led insurance companies to deny him coverage for the past 15 years.

Thanks to the Affordable Care Act, beginning January 1, Will and his wife and son will be covered under a plan they found on Kynect, Kentucky's health insurance exchange. Will estimates his family will save \$300 a month. Add that to the peace of mind that comes with knowing he will never face medical bankruptcy and the threat of losing his thriving business just because he didn't have access to insurance.

He has been so pleased with the ease and affordability of Kynect that he is now exploring coverage for his employees for the first time through the State's small business exchange. Mr. Speaker, Will's story is one among millions of Americans who are finding expanded care through the Affordable Care Act. To quote Will:

It's going to be a new day for my family, for me, and so many people just like us in Kentucky and throughout the country.

SHARE YOUR OBAMACARE STORY

(Mr. GOSAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSAR. Mr. Speaker, I rise today to talk about the millions of Americans who have lost their health insurance under ObamaCare.

The House Committee on Oversight and Government Reform, the Federal Government's chief watchdog, is holding a field hearing this Friday in Apache Junction, Arizona, entitled, "ObamaCare Implementation, the Broken Promise: If You Like Your Current Plan, You Can Keep It." As a member of this committee, I am joining Chairman DARRELL ISSA to listen to Arizonans tell their ObamaCare nightmares.

I want to know how this terrible law is hurting you personally so we can show President Obama and the Senate Democrats the damage ObamaCare is inflicting throughout Arizona and across the country. I encourage you all to come and let your voices be heard.
